Key Data

In the past 15 years of his professional carrier, Alon has gained architectural experience in wide variety of project types, including: residential, retail, commercial and corporate office facilities, for both public and private clients.

He has managed large scale commercial and retail projects and led international design teams through all the project phases. Alon is leading MYS Architects Green Team in search for creative sustainable solutions for clients and office projects. He is a LEED certified professional since 2002, his involvement and interest as a member of the USGBC began over a decade ago while working with leading firms in the US.

Selected Projects

Cotroceni Shopping Center, Bucharest, Romania

Lead and managed the design team from conceptual design to completion of this award winning mega mall complex. The projects' total development area is 250,000 sq.m, and it combines retail area, cinema complex with 20 theatres and an IMAX cinema, indoor open space with about 5,000 sq.m, of sports and recreational arena.

Arad Mall and Business Building, Arad, Romania

Architectural design for a modern shopping center with approximately 75,000 sq.m, of retail area along with 15,000 sq.m of office building.

Craiova Town Center

A design competition for a mixed use shopping center, office building, and city amenities.

Audi & Skoda Central Service Center, Petach Tikva Israel

Design main car service center for Skoda & Audi automobile agencies. The project includes 24 lift bays and a split level customer service center.

Short Pump Lifestyle Center, Richmond, Virginia

This open-air town center contains over 350,000 sq.m of leasable area in two storey covered promenades.

East-View Mall – a Lifestyle Center, Victor, NY

A new architectural addition of a lifestyle center component to an existing 1970s' era mall brings new organization and focus to a mall. The design creates a restaurant and retail district which forms an urban, horseshoe shaped plaza.

Courthouse Tower - a Mixed Use Tower, Cleveland, Ohio

A design for a 31 storey tower in the downtown area. This complex mixed use project integrates a five star hotel with 300 rooms and SPA amenities at the towers' underground levels.

PMBNA Corporate Building, Cleveland, Ohio

An addition of 17,000 sq.m to a corporate office building at a multi- phased project as part of a regional headquarter plan.

University Square – Multi level retail complex in University Heights, Ohio

An architectural design for a multi-level urban retail complex in a dense city fabric. The project's challenge was to introduce 67,000 sq.m of retail and a 2,300 cars parking garage where visitors can traverse the entire complex without using their cars.
