Omer leads his projects from the conceptual design to construction completion. He has been working for MYS Architects since 2007. Previously Omer worked in England for MASON GILLIBRAND ARCHITECTS.

Selected Projects

Teaching Military hospital of Brazzaville, Congo

Team leader – The project includes a new main building with an ER, imaging, operating facilities, Daycare facilities, inpatient departments and a VIP department. The site also included an outpatient building, a mother and child building, education center, commercial center, Hotel, sport center and staff residential building. Total project area – 55,000 sq.m. The hospital design was driven by the functionality of the hospital, creating a good clear connection between the departments and the buildings while making sure all patient and staff work in a well lit healing environment. The site topography was used to create different entrance points for guests, patients and services.

Abarbnel Mental health hospital, Bat Yam, Israel

Team Leader – The project included a new enclosed youth department and an enclosed Autistic department and a hostel within an existing mental health hospital. Total project area – 5,500 sqm. The project required conducting a deep research into the special requirements of the patient and staff.

Champion Tower, Bnei Brak, Israel

Project architect – The project is located at the developing Bnei-Brak Business Center, facing one of the largest shopping malls in Israel. Champion Tower is home to the main Audi, Volkswagen and Skoda dealerships and offices. Total project area - 100,000 sq.m. Champion Tower includes 32 office floors above five parking levels and a ground floor with retail, cafes, restaurants and the large car showrooms. Its two façades communicate with one another, one clad with glass in a geometrical white division, and the other with glass in a horizontal and vertical grey division. The two masses embrace each other, creating a dialogue between the two volumes.

Stockport Road, Manchester, England

Project architect - development of 34 apartments that included 3 buildings and Semi underground car parking.

Agden Hall Cottage, England

Project architect – conversion of an existing barn to 6 houses while retaining the existing features of the buildings.
